Done! 🎮 I made **Bodiddly Core** as a standalone website that works in Safari.

🌐 **Open/download Bodiddly Core**

You can open the file in Safari and play the flying game. 🛩️ ‹/›

How do I open it in safari

If you're on a **Mac**, do this:

1. Click 🌐 Bodiddly Core above.
2. Save the file to your Mac.
3. Open **Finder** → **Downloads**.
4. Find `bodiddly_core.html`.
5. **Right-click** it → **Open With** → **Safari**.
6. 🎮 The Bodiddly Core game should open in Safari.

If Safari doesn't appear under **Open With**, tell me what you see and I'll walk you through it.

I'm on iPad

Yep! On an **iPad**, it's a little different.

1. Tap Bodiddly Core .
2. When the file appears, tap the **Share** button (□↑).
3. Choose **Save to Files**.
4. Pick **On My iPad → Save**.
5. Open the **Files** app.
6. Find `bodiddly_core.html` and tap it.

⚠️ **One thing:** iPadOS may not run a downloaded `.html` file directly in Safari the same way a Mac does.

If you want, I can instead make you a **Bodiddly Core webpage that you can open from a normal Safari web address**.
